## USING YOUR MAVRO

**The Totally Wicked Mavro is a rechargeable, refillable pod device. The Mavro's refillable pods can be used with almost any e-liquid.**

### FILLING THE MAVRO POD

Remove the Mavro pod from all packaging. Open the filling port indicated by the arrow. Fill with e-liquid, ensuring to leave a 2mm air gap. Close the filling port. Insert the pod into the Mavro.

**Note:** After filling the pod, it is recommended to wait 5 minutes to ensure the atomizer head is fully saturated.

### POWER ON AND OFF

To turn the device on or off, quickly touch the power button 8 times. The screen on the front of the device will light up with the resistance of the current connected pod when turning on, and will disappear completely when turning off.

**mavro**

13

## USING YOUR MAVRO

### VAPING

Inhale gently on the mouthpiece and the device will begin to produce vapour. The screen will illuminate.

### ADJUSTING THE AIRFLOW

The Totally Wicked Mavro has an adjustable airflow control located on the side of the device. When the control button is at the bottom, the airflow is fully closed. When pushed to the top, the airflow is at its most open position. Adjust until you are happy with the airflow resistance of the device.

### ADJUSTING THE POWER

The Totally Wicked Mavro has adjustable wattage from 6 to 40W in 1W increments. With the device on and a pod connected, touch the power button 5 times in quick succession, and two arrows will appear on the screen. The arrow closest to the USB-C port turns the wattage down, the arrow closest to the power button turns the wattage up.

The Totally Wicked Mavro has built in atomizer protection, preventing the wattage from being set too high from the inserted resistance pod.

### MEMORY FUNCTION

Once you have set your preferred wattage, vape 3 times consecutively with a puff duration above 1 second without removing your pod. The device will remember your preferred set wattage indefinitely. The Mavro comes with 3 pre-selected wattage recommendations for different resistances. See table below.

Atomizer Resistance	Recommended Power (w)	Power Range (w)
0.3ohm	35W	30-40W
0.6ohm	22W	15-25W
0.8ohm	18W	13-20W

**Note:** The device will store up to 3 different wattages for different resistance pods, but each one will need to be set separately.

15

## USING YOUR MAVRO

### PUFF COUNTER

The Totally Wicked Mavro has a built-in puff counter for monitoring use of the device. This will be displayed as soon as you stop vaping. The puff counter will continue to count up to 999, at which point it will revert to counting from 0. To manually reset the puff counter, turn the device off by quickly pressing the power button 8 times, insert and remove the pod 3 times within 2.5 seconds, the puff counter will reset to 0.

### CHARGING THE BATTERY

The Totally Wicked Mavro requires charging, generally on a daily basis, but dependent on use. A newly charged battery will provide sufficient power for approximately two pods of e-liquid, but likely not a third. To charge the battery, connect the Mavro to a suitable USB power supply using the USB-C cable provided. When charging, the screen will indicate the current level of charge. As the device charges from empty to full, the battery symbol on the screen will accumulate more bars.

## BATTERY LIFE INDICATION

The Totally Wicked Mavro can indicate 5 levels of battery charge, shown by the battery indicator on the device screen. Below is a table detailing battery life indication.

Indicator light	Battery Level
	100 - 81%
	80 - 61%
	60 - 41%
	40 - 21%
	20 - 2%
	2 - 0% (battery symbol will flash)

## CHANGING THE POD

To change the Mavro pod, remove the old pod and dispose of it. With a new pod, follow the instructions detailed in *"Filling the Mavro Pod"*.

Once filled, insert the new pod. Please remember that after filling a new pod, it is recommended to wait 5 minutes to ensure the atomizer head is fully saturated.

The pod should be changed when the internal atomizer has reached the end of its working life. Indicators that the pod may require replacement include a slight burnt taste, general loss of vapour production or a reduction in flavour intensity.

## CLEANING THE MAVRO

Clean the Totally Wicked Mavro using a soft dry cloth or tissue; care should be taken to avoid direct contact with water. Clean the pod connection point in the battery carefully using a dry cotton swab.

**Note:** To avoid damaging the atomizer head, do not allow it to come into contact with water. Do not submerge the Totally Wicked Mavro battery unit in water or allow it to get wet.

## KIT CONTENTS

- 1 x Mavro battery
- 2 x Mavro pods (0.3ohm)
- 1 x USB-C cable
- 1 x User manual

## SPECIFICATIONS

- Dimensions: 107mm x 35mm x 18mm
- Weight: 85g
- Battery capacity: 1600mAh
- Max charging current: 2.0A

## ADDITIONAL PRODUCT INFORMATION

There are no reported medical side effects with this product. If you believe you experience a side effect, please contact the manufacturer.

## **WARNING**

This product contains magnets. If you have an ICD or pacemaker, avoid close or prolonged contact with pods that are not fitted into the battery, and keep the assembled device at least 15cm from where your device is implanted.

## **WARRANTY**

The Totally Wicked Mavro has a 6-month parts warranty with the exception of pods, which are consumable items and covered by "dead on arrival" warranty only. If any parts are found to be faulty within this time, please contact our customer service team, whose details are on the back page of this booklet, and we will arrange for a replacement. We may require the goods to be returned for further investigation.

## PRODUCT STORAGE, CHARGING AND BATTERY PRECAUTIONS

- Store the Mavro and its accessories away from children whilst not in use.
- Please only use the USB-C cable provided. Or a genuine TW accessory
- The Mavro is intended to be charged using a certified USB charger with a rated output of 5V dc, 0.5A minimum, or a certified host computer using USB 2.0 or higher. A suitable charger is available from all dedicated Totally Wicked stockists.
- Unplug the battery from the charging device as soon as it is fully charged.
- Do not leave battery unattended when on charge.
- Do not charge the battery close to flammable materials or valuables.

- Do not charge the battery in a damp environment, or in temperatures under 0°C or above 45°C.
- Do not use the device in temperatures under -10°C or above 60°C.
- Please dispose of dead batteries in accordance with your country's appropriate legislation.
- Do not carry batteries in a pocket or bag with metallic objects.
- Do not attempt to repair a faulty Mavro battery as these are sealed units with no serviceable parts. Attempted repairs will void the warranty.
